0.82 in
21 mm

- Groove secures trellis wires to prevent pots falling over in high wind or uneven land (1205001 & 1205002).
- Clips hold cooling skirt in place.
- The cooling skirt can be tucked into hose clip to support microbial activity in organic production.
- Save money by using 50% less micro tubing.
- Elevates emitter, micro tube and hose off the ground where it could be damaged or pulled out.
