innovative products  
for smart growers

## 8 Liter Pot

For tabletop production

Plantlogic pots are designed to maximize drainage and oxygen uptake to support healthy roots and plant vigor.

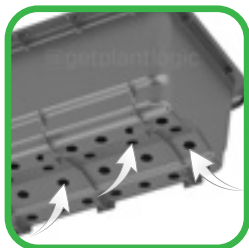

Large truss support and a ridge in the middle pushes fruit to the edges where it can more easily be harvested.

Prevents plastic pollution.

Reduces labor cost of separating plastic from substrate.

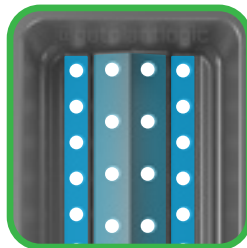

Stable fit in standard single and double channel 16 and 20 cm metal gutter.

Pyramid design causes drainage into high air flow area, where roots air prune.

### Airflow and oxygenation

Non-draining central holes allow oxygen uptake in center of root mass, and prevents growing down.

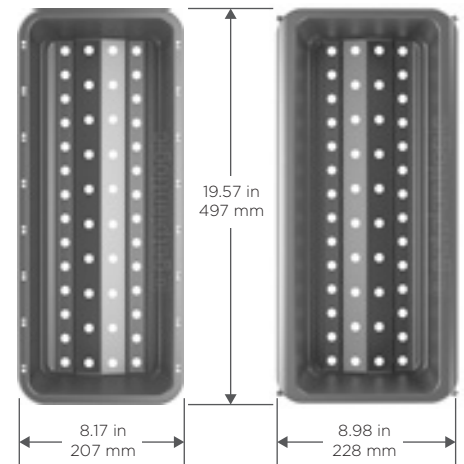

### Excellent drainage

Pyramid base forces water to drain at the outside edges, minimizing wet zone.

### Marks for drippers

Makes it easy for the grower to install the dripper.
