### Liter Pots

For tabletop production

Designed to fit our Hi-grow® system.  
Available with truss support for strawberries, or without for other crops.  
Hard container allows for interplanting or moving of plants from nursery to production area without damaging roots.

Drainage collection keeps plants off the ground and prevents roots from contact with drainage water.  
Prevent groundwater pollution from run off.  
Save money by reusing fertilizer.

Save money by using bulk substrate.  
Avoid pollution or high labor costs of removing plastic from bags or slabs.  
Makes reuse of substrate easier.

#### Maximize the crop area

Overlapping handles saves space along row.

#### U-grooves

Specially made for better placement of irrigation pipes. Ø 14 and 24 mm

Item #	Truss Support	U-grooves
