

Bag Base Drainage Collection

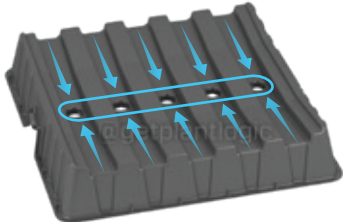

Ideal for bag growers on soft ground

Smart, efficient solution for drainage collection while using bags.

Cheap narrow gutter makes it easier and faster to clean, keeping sediments and old/dead leaves out.

Drainage collection helps control humidity in greenhouses. Save on water, fertilizer and fungicides.

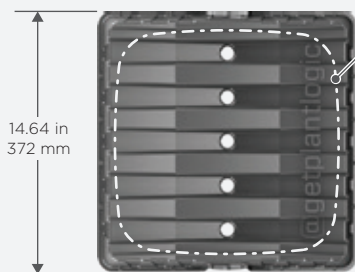

Designed with internal channels that drives water out, allowing to collect all the drainage only in the gutter.

Ideal drainage & water waste solution when using bags.

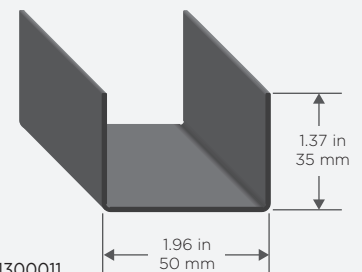

Wide base prevents bags from sinking into soft ground.

Maximum bag size
12.87 in
327 mm
