

innovative products for smart growers

Liter Square Short Pot

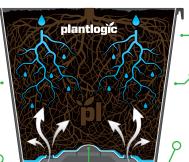

Ideal for substrate production

Plantlogic pots are designed to maximize drainage and oxygen uptake to support healthy roots and plant vigor.

Ribs on pot wall prevent root spiraling keeping roots from Q becoming root bound.

> 3 cm tall legs prevent root contact with soil and pathogens.

> > Wide legs help prevent sinking into soft ground.

Small pot for higher cold storage efficiency.

Improves drainage and root zone health.

Legs connected to edge holes break drainage surface tension, eliminating saturated zone.

Pyramid design causes drainage into high air flow area, where roots air prune.

Airflow and oxygenation

Non-draining central holes allow oxygen uptake in center of root mass, and prevents growing down.

Excellent drainage

Pyramid base forces water to drain at the outside edges, minimizing wet zone.

Hooks for stabilization

Prevents the pot from tipping over.

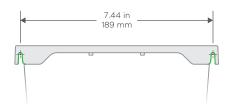

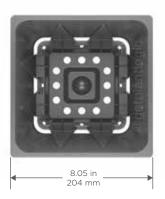

Easy repotting

Designed for easy repotting into our 7 liter pot.

Hooks for stabilization
