Culti-base

Grow bag with integrated base.

Pyramid base

Forces water to drain at the outside edges, minimizing the wet zone.

Air flow

Non-draining central holes allow oxygen uptake in the center of root mass and prevent roots from growing down.

5 cm tall legs

Prevent root contact with soil and pathogens for nutrition control and risk management.

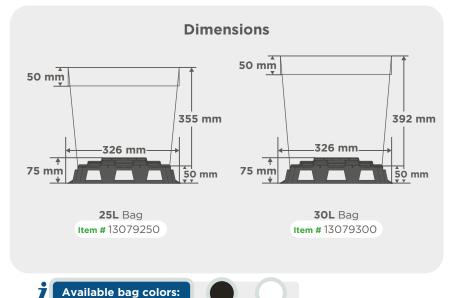

Supports up to 90 kg

Stable base

With large surface area promotes stability even on soft ground.

Bag + base pot requires no assembly.
