VF Bag base

Low-cost base for grow bags.

A 5 cm tall platform

Keeps roots out of the drainage and promotes efficient drainage.

B Airflow and oxygenation

Open airflow underneath keeps roots off the ground preventing contact with pathogens.

C Unique sloped structure design

Allows grow bags to sit stably on the base.

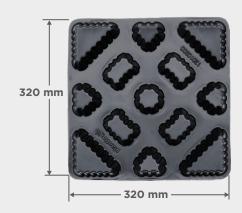

(**D**) Low cost

More economical than rigid bases whose legs easily break or their bases collapse with the weight of bags.

*Supported weight limit 60 kg
