Drainage collection pot

Economic, no drain-to-waste solution.

plantlogic

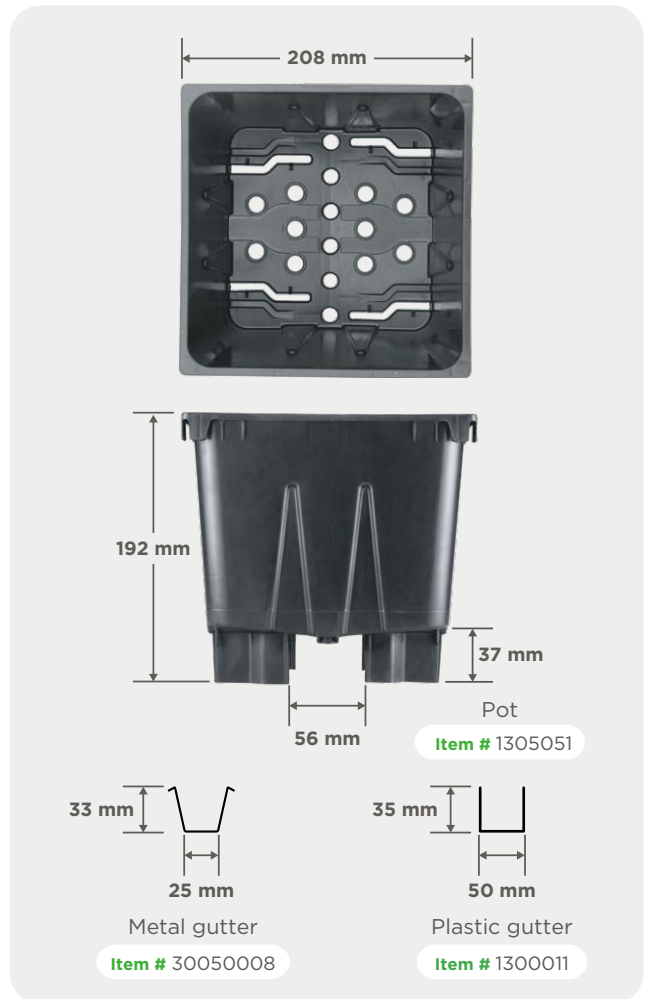

innovative products
for smart growers

**NEW
DESIGN!**

Dimensions

The **Plantlogic**® DC pots direct water flow into a narrow gutter which channels drainage out of the growing area, keep ground free of water and fertilizer, reducing humidity and encouraging oxygen uptake.

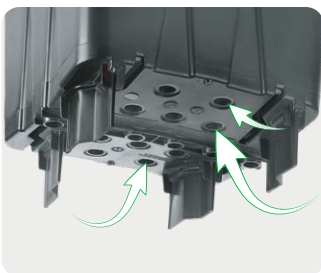

A Hooks for stabilization

Handles easily hooks to trellis wire.

B Air flow

Non-draining central holes allow oxygen uptake in center of root mass, and prevents roots from growing down.

C Excellent drainage

Our unique base design forces water to drain from the center holes, minimizing the wet zone.
